HIGHEST RANKED WILDLIFE HABITAT BY ECOLOGICAL CONDITION

- Highest Ranked Habitat in NH
- Highest Ranked Habitat in Biological Region
Biological region = TNC ecoregional subsection for terrestrial habitats or watershed group for wetlands and forest floodplain.
- Supporting Landscapes *(of regional significance)*
- Wildlife Habitat not top-ranked
(locally significant habitat scores to be determined)
- Developed land cover

- Information about habitat condition was analyzed to develop a statewide and regional ranking and identify the highest quality habitat relative to all polygons of a given habitat type in the state.
- The goal is to provide regional planners and conservation professionals a tool in identifying the most critical wildlife habitat locations.
- Results will be re-evaluated to monitor the effectiveness of conservation actions and respond appropriately to new information or changing conditions.

4 1 inch equals 0.4 miles
